Biofuels

STX Climate Solutions

Since its founding in the heart of Amsterdam in 2005, STX has become one of the global leaders in helping companies achieve their environmental commitments.

- 120+ market experts spanning across 25 nationalities
- 3 offices in Amsterdam (HQ), Gothenburg, & New York
- One-Stop-Shop for environmental solutions

STX Climate Solutions helps you tailoring and optimizing your individual procurement strategy for renewable energy. And puts it to practice.

- Procurement strategy optimization for renewable energy
- Access to global renewable energy markets
- Energy Attribute Certificates (EACs), *Carbon Offset*, *Biogas*, *Compliance*, and *Biofuels*
- Tailored solutions to reduce your carbon footprint

We make sure you remain competitive in a sustainability-driven world.

CDP's Accredited Solutions Provider

Environmental targets can best be reached by combining solid measurements of CO₂-emissions combined with proper disclosure of your climate actions to stakeholders. Therefore, we established a close partnership with the Carbon Disclosure Project (CDP), the worldwide standard in sustainability rating and environmental efforts.

How does it work?

Development and execution of your renewable energy strategy

1. Situation Assessment

- What is your global sustainability strategy?
- How do you currently approach the purchase of renewable electricity, biogas, biofuels and offsets?

2. Procurement strategy

- Embed procurement into sustainability strategy
- Developing steps towards climate neutrality
- Including market and regulatory developments into strategy building

3. Implementing the first steps

- Developing product solutions for the first steps with STX' global markets access and insight
- Choosing projects and specifications for renewable energy products and offsetting

4. Transaction

- STX executes the trades
- STX delivers regulation-compliant product for the sharpest price

5. Analysis & Ongoing support

- Situation Analysis
- Adjusting and implementing next steps
